

Magic Mirror Lightbox

Product Model: ML5550

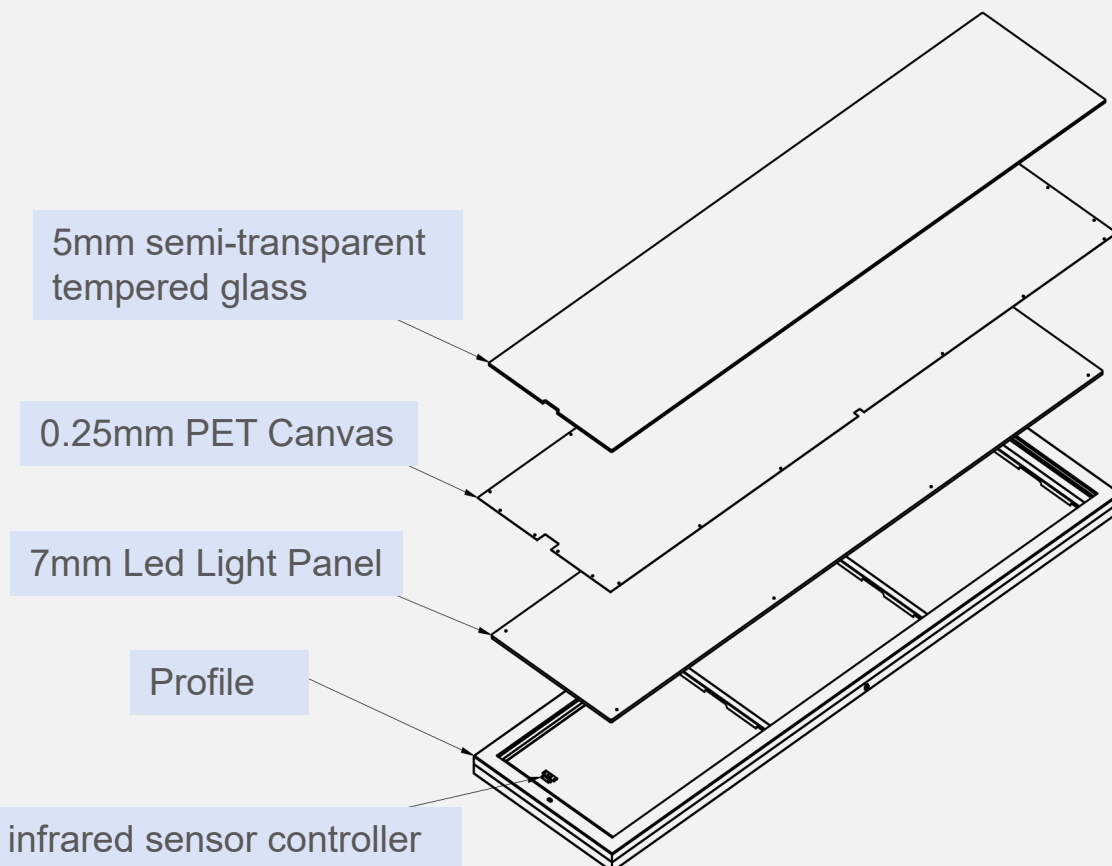

- ◆ The magic mirror lightbox is a high-tech, multifunctional fixture that combines advertising, decorative lighting, and a practical mirror through its intelligent sensor control. Compared to traditional lightboxes, it is more novel, aesthetic, and functional.
- ◆ With semi-transparent mirrored glass, it uses LED strips and a light guide panel to project customizable images onto the mirror. The built-in sensor turns the lightbox into a mirror when someone stops in front of it and back into an ad display once they leave, offering a unique, stylish effect.

Product Characteristics

- ◆ The frame is made of high-quality carbon steel with a surface coated by high-pressure electrostatic spraying, and the color can be customized.
- ◆ It features a light guide panel for soft, even lighting.
- ◆ The front is equipped with 5mm semi-transparent tempered glass, combined with an infrared sensor controller. When approached, transforming it into a mirror, and turns it back on to display ads when no one is near.
- ◆ The sensor range is ≤ 2 meters and adjustable.
- ◆ A side lock allows for easy image replacement, and the size is customizable.

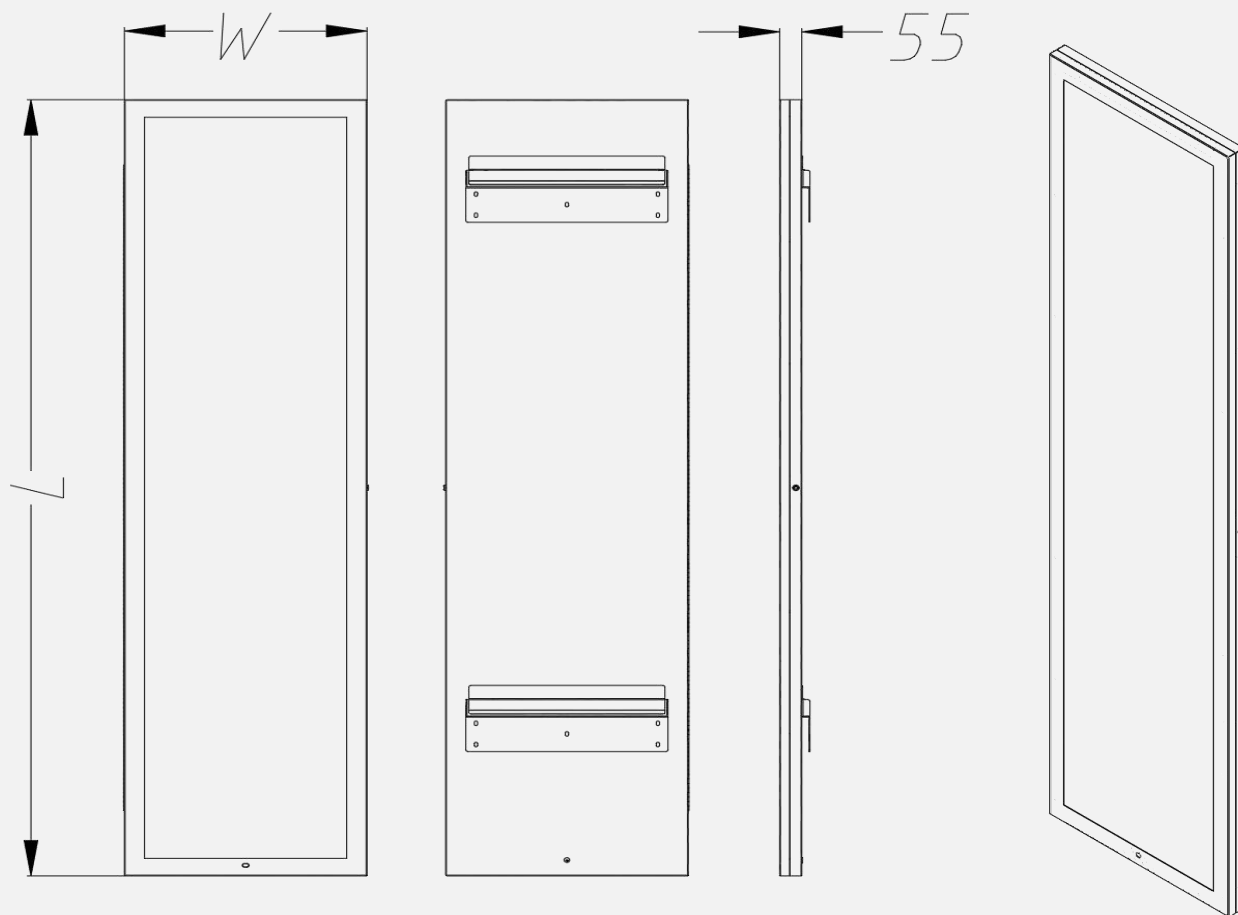

Product Frame

Light Source Specification

Model	Color Temperature/ K	LED Strip Width/mm	Color Rendering Index/Ra	Voltage/V	Power W/M
RL-24V-2835-W6-1000*5-120D-12W	3000-6500	5mm	85-90	DC24V	12W

Product Specification

Model	Frame Size L*W/mm	Visual Size/mm	Thickness /mm	Package Size/mm	Volume/m ³	Gross Weight /kg	
ML5550	1	2400*600	2100*500	55	2480*800	0.45	45
	2	1200*600	900*500		1280*800	0.23	25

It can also be customized.

Application Case
